Before you use your range

Read this Use & Care Guide and The Cooking Guide for important safety information.

You are personally responsible for:

- Reading and following all safety precautions in this Use & Care Guide and the Cooking Guide.
- Installing the range where it is protected from the elements, and on a floor strong enough to support its weight.
- Properly connecting the range to electrical supply and grounding. (See "Installation Instructions.")
- Making sure the range is not used by anyone unable to operate it properly.
- Properly maintaining the range.
- Using the range only for jobs expected of a home range.

See "Cooking Guide" for important safety and use information.

IMPORTANT SAFETY INSTRUCTIONS

WARNING – When using your range, follow basic precautions, including the following:

- 1. DO NOT** allow children to use or play with any part of the range, or leave them unattended near it. They could be burned or injured.
- 2. DO NOT** store things children might want above the range. Children could be burned or injured while climbing on it.
- 3. DO NOT** allow anyone to touch hot surface units or heating elements. Dark colored units and elements can still be hot enough to burn severely.
- 4. KEEP** children away from the range when it is on. The cooktop and oven walls, racks and door can get hot enough to cause burns.
- 5. DO NOT** use the range to heat a room. Persons in the room could be burned or injured, or a fire could start.
- 6. KEEP** pan handles turned in, but not over another surface unit to avoid burns, injury and to help prevent the utensil from being pushed off the surface units.
- 7. DO NOT** use water on grease fires. The fire will spread. Cover fire with large lid or smother with baking soda or salt.
- 8. DO NOT** wear loose or hanging garments when using the range. They could ignite if they touch a hot surface unit or heating element and you could be burned.
- 9. DO NOT** heat unopened containers. They could explode. The hot contents could burn and container particles could cause injury.
- 10. When adding or removing food, MAKE SURE** to open the oven door all the way to prevent burns.

• FOR YOUR SAFETY •

DO NOT STORE OR USE GASOLINE OR OTHER FLAMMABLE VAPORS AND LIQUIDS IN THE VICINITY OF THIS OR ANY OTHER APPLIANCE. THEY COULD IGNITE CAUSING EXPLOSION AND/OR FIRE.

– SAVE THESE INSTRUCTIONS –

Copy your Model and Serial Numbers here...

If you need service, or call with a question, have this information ready:

- 1. Complete** Model and Serial Numbers (from the plate located as shown).
- 2. Purchase date** from sales slip.

Copy this information in these spaces. Keep this book, your warranty and sales slip together in a handy place.

Parts and features

Model RF014PXR

Using the surface units

Control knobs must be pushed in before turning them to a setting. They can be set anywhere between HI and OFF.

Surface Unit Indicators

The solid dot in the surface unit indicator shows which surface unit is turned on by that knob.

Signal Light

The Top Signal Light will glow whenever a surface unit is ON.

WARNING: Be sure all lights are OFF when you are not cooking. Someone could be burned or a fire could start if a surface unit is accidentally left ON.

Until you get used to the settings, use the following as a guide. For best results, start cooking at the high settings; then turn the control knob down to continue cooking.

Use HI to
start foods
cooking; to
bring liquids
to a boil.

Use 5 or 6
to hold a
rapid boil; to
fry chicken
or pancakes.

Use 4 for
gravy, pud-
dings and
icing; to cook
large amounts
of vegetables.

Use 2 or 3
to keep food
cooking after
starting it
on a higher
setting.

Use SIM to
keep food
warm until
ready to
serve. Set the
heat higher
or lower to
keep foods at
the tempera-
ture you want.

CAUTION: The use of the HI setting for long periods of time can damage surface units and discolor chrome reflector bowls. Start cooking on HI and turn control down to continue cooking.

Use only flat-bottomed utensils for best cooking results and to prevent damage to the cooktop. Specialty items with rounded or ridged bottoms (woks, ridged bottom canners or tea kettles) are not recommended.

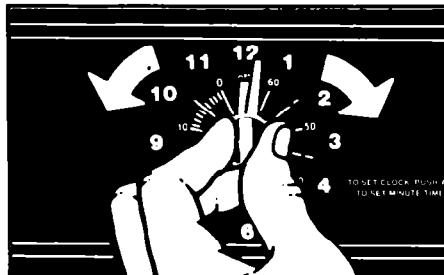

WARNING: The surface unit should never turn red during use. If it turns red, the bottom of the pan is not flat enough or is too small for the size of the surface unit. Damage to the surface unit, cooktop, wiring and/or surrounding area could result. If the pan is too small for the surface unit, you could be burned by the heat from the exposed section of the surface unit.

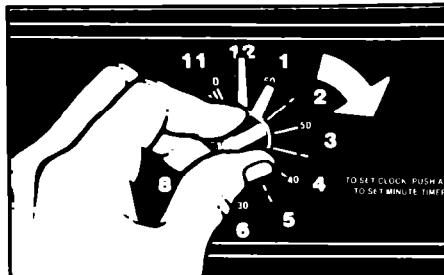

See the "Cooking Guide" for important utensil information.

Setting the Clock

Push in and turn the Minute Timer Knob to set the Clock.

1. Push in Minute Timer Knob and turn in either direction until clock shows the right time of day.

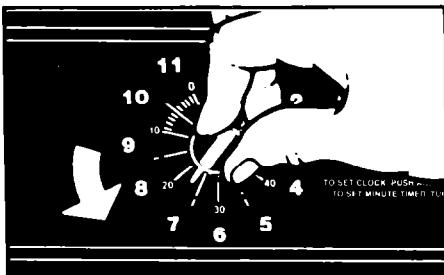

2. Let the Minute Timer Knob pop out. Turn clockwise until Minute Timer hand points to OFF. The clock setting will change if you push in the knob when turning.

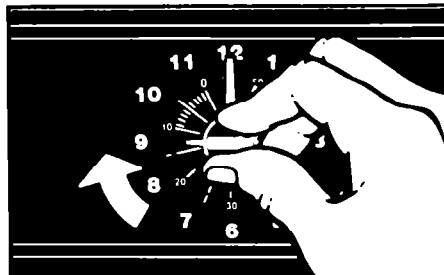

Using the Minute Timer

The Minute Timer does not start or stop the oven. It works like a kitchen timer. Set it in minutes up to an hour. You will hear a buzzer when the set time is up.

DO NOT PUSH IN THE KNOB when setting the Minute Timer.

1. Without pushing it in, turn the Minute Timer Knob until the hand passes the setting you want.

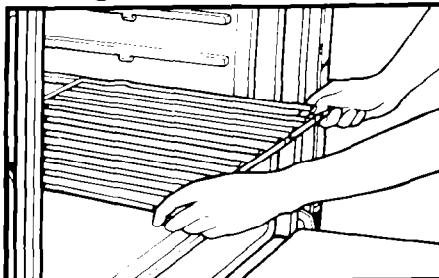

2. Without pushing in, turn the knob back to the setting you want. When the time is up, a buzzer will sound. To stop the buzzer, turn the Minute Timer hand to OFF.

PUSHING IN AND TURNING THE MINUTE TIMER KNOB CHANGES THE CLOCK SETTING.

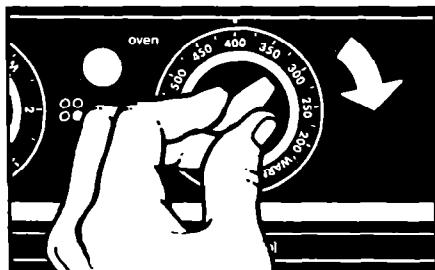

Using the Oven Control

Baking

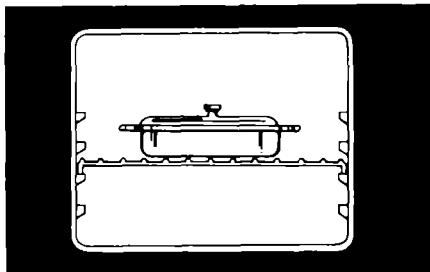

Racks should be placed so the top of the food will be centered in the oven. Always leave at least 1½ to 2 inches (4-5 cm) between the sides of the pan and the oven walls and other pans. For more information, see the "Cooking Guide."

1. Position the racks properly **before** turning on the oven. **To change rack position**, pull rack out to stop, raise front edge and lift out.

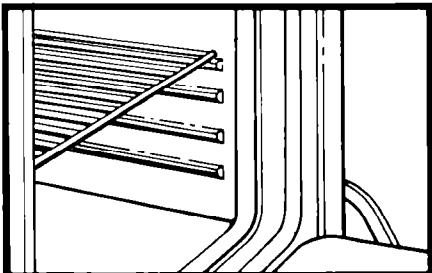

2. Set the Oven Control to the baking temperature you want. The Oven Signal Light will come on. The oven is preheated when the Oven Signal Light first goes off.

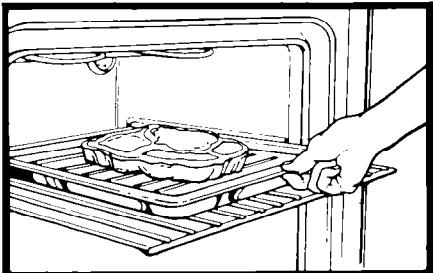

3. Put food in the oven. **NOTE: Oven racks, walls and door will be hot.** During baking, the elements will turn on and off to keep the oven temperature at the setting. The Oven Signal Light will turn on and off with the elements. **The top element helps heat during oven preheat.**

4. When baking is done, turn the Oven Control to OFF.

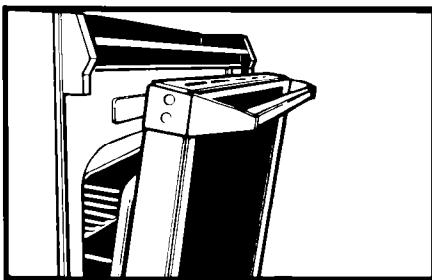

Broiling

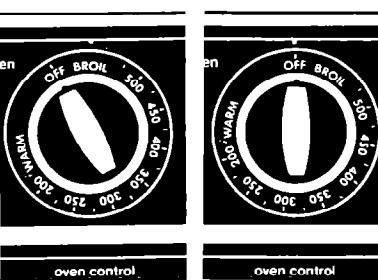

1. Position the rack before turning the oven on. See broil chart in the "Cooking Guide" or a reliable cookbook for recommended rack positions.

2. Put the broiler pan and food on the rack.

3. Close the door to the Broil Stop position, (open about 4 inches, 10.2 cm). The door will stay open by itself.

4. Set the Oven Control to BROIL.

5. When broiling is done, turn the Oven Control to OFF.

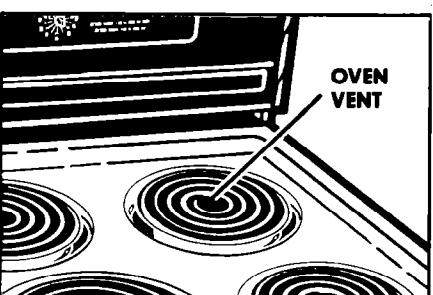

The Oven Vent

Hot air and moisture escape from the oven through a vent under the right rear surface unit. You can cook on the unit, or keep food warm on it while the oven is on.

CAUTION: Plastic utensils left over the vent can melt.

WARNING: If you leave a utensil on the right rear surface unit, use pot holders when moving it. Pan handles can become hot enough to burn.

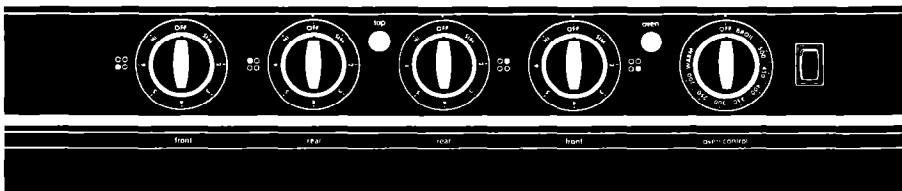

Do not block the vent. Poor baking can result.

Caring for your range

Control Panels

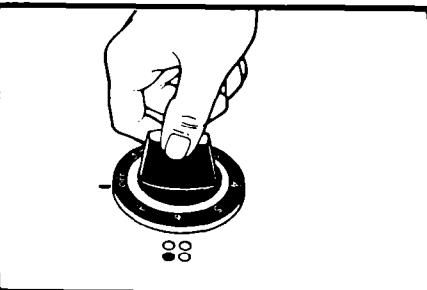

WARNING: To avoid burns, first make sure all controls are off and the range is COOL.

1. Pull knobs straight off.
2. Use warm soapy water, baking soda and a damp soft cloth or spray glass cleaner to wipe the control panels. Rinse and wipe dry.
3. Wash knobs in warm soapy water or use baking soda and a damp, soft cloth or follow directions provided with glass cleaner. Rinse well and dry.
CAUTION: Do not soak or use abrasive cleansers. They could rub off the markings.
4. Push the knobs straight back on. Make sure they point to OFF.

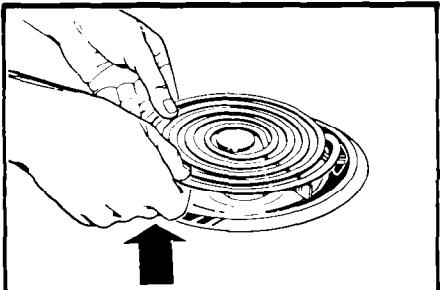

Surface Units and Reflector Bowls

1.

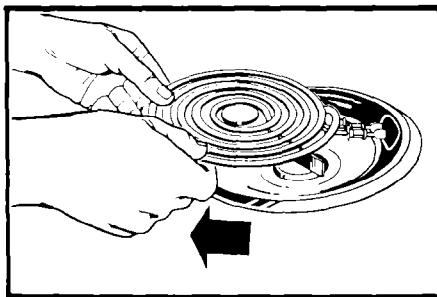

WARNING: To avoid burns and possible electric shock, be sure surface units are OFF and COOL.

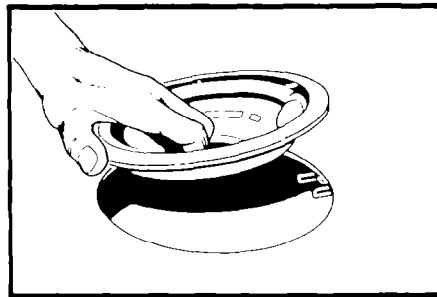

2.

2. Lift the edge of the unit, opposite the receptacle, just enough to clear the reflector bowl.

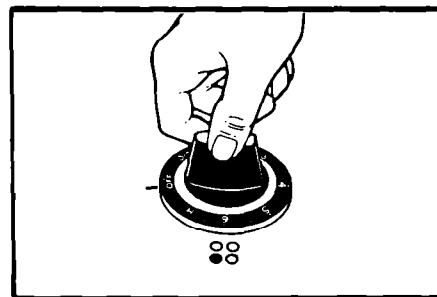

3. Pull the surface unit straight away from the receptacle.

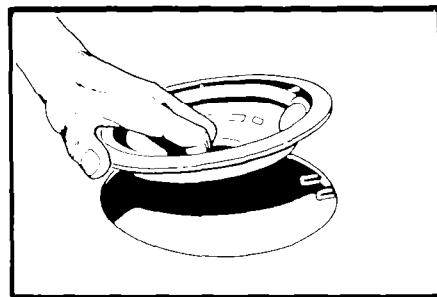

4. Lift out the reflector bowl. See Cleaning Chart on page 13 for cleaning instructions.

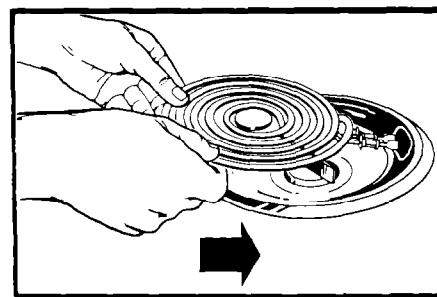

Replacing

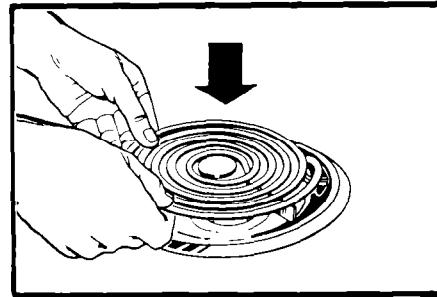

1. **WARNING: To avoid burns and possible electric shock, be sure surface units are OFF.**

2. Line up opening in the reflector bowl with the surface unit receptacle.

3. Hold the surface unit as level as possible with the terminal just started into the receptacle.

4. Push the surface unit terminal into the receptacle. When the terminal is pushed into the receptacle as far as it will go, the surface unit will fit into the reflector bowl.

CAUTION: Reflector bowls reflect heat back to the utensils on the surface units. They also help catch spills. When they are kept clean, they reflect heat better and look new longer.

If a reflector bowl gets discolored, some of the utensils may not be flat enough, or some may be too large for the surface unit. In either case, some of the heat that's meant to go into or around a utensil goes down and heats the reflector bowl. This extra heat can discolor it. See "Cooking Guide" for further information.

WARNING – DO NOT LINE THE REFLECTOR BOWLS WITH FOIL.
Shock or fire hazard could result.

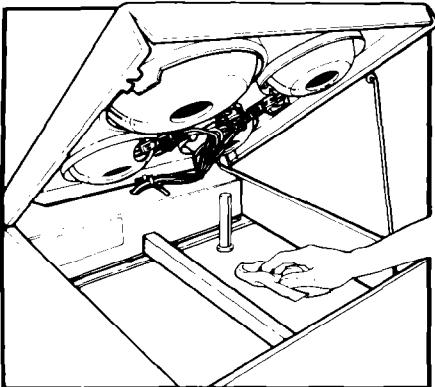

Lift-Up Cooktop

1. Lift front of cooktop at corners and swing up the support rod.
2. Carefully lower the cooktop onto the support rod.

WARNING: Be sure the rod fits in the notch in the cooktop and is held securely. The cooktop could accidentally fall and injure you. Do not drop the cooktop. Damage can result to the porcelain and the cooktop frame.

3. Wipe surface under cooktop with warm soapy water. Use soapy plastic scrub pad on stubborn spots.

The Oven Door

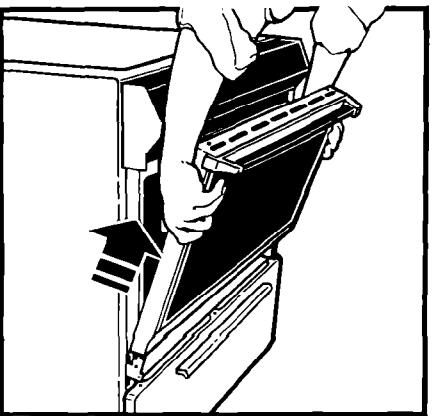

Removing the oven door will help make it easier to clean the oven.

WARNING: To avoid burns, be sure the oven is OFF and cool.

1. Open the door to the first stop position.
2. Hold the door at both sides and lift it at the same angle it is in.
3. To replace, fit the bottom corners of the door over the ends of the hinges.

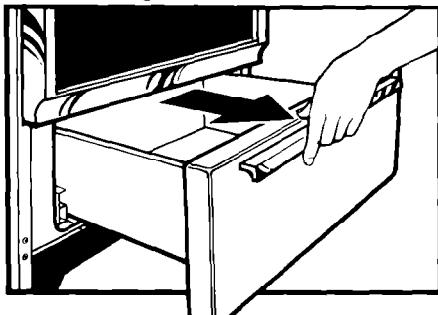

Push the door down evenly. The door will close only when it is on the hinges correctly.

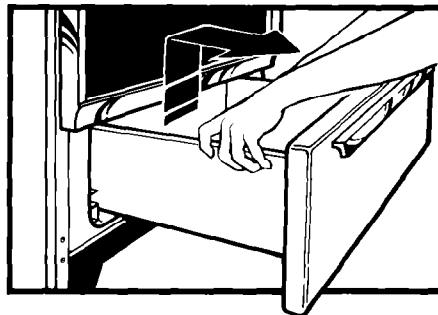

The Storage Drawer

The storage drawer is for storing pots and pans. Never keep anything in the drawer that could burn or melt.

Removing the storage drawer

1. Pull drawer straight out to the first stop. Lift front and pull out to the second stop.

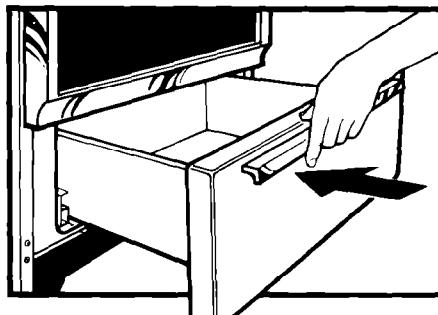

2. Lift back slightly and slide drawer all the way out.

Replacing the storage drawer

1. Fit ends of drawer slide rails into the drawer guides on both sides of opening.

2. Lift drawer front and push in until metal stops on drawer slide rails clear white stops on drawer guides. Lift drawer front again to clear second stop and slide drawer closed.

Standard Oven Cleaning

The Standard Oven has to be hand cleaned. Use warm soapy water, steel wool pads and a commercial oven cleaner. See "Cleaning Chart" for further instructions.

Do not allow commercial oven cleaner to contact the oven seals or exterior surfaces of the range. Damage will result.

Using Foil

Using foil on the oven bottom is recommended to catch sugar and starchy spills from pies and casseroles. **It must be used properly.** Cut foil from a roll of heavy-duty 18-inch (45 cm) aluminum foil. **Slide foil under the bake element.** The foil should be centered and long enough to start up both oven sides without wrinkles.

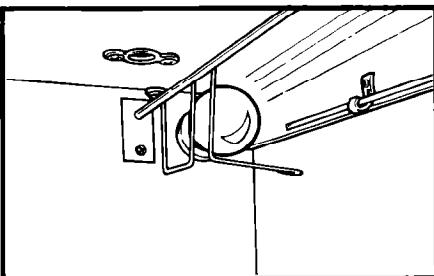

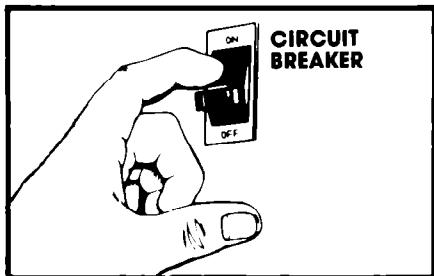

CAUTION: Do not let foil touch the bake element. It could damage the element. Make sure foil is flat on the oven bottom and away from the bake element.

Cleaning Chart

PART	WHAT TO USE	HOW TO CLEAN
Exterior surfaces	Soft cloth and warm soapy water. Nylon or plastic scouring pad for stubborn spots.	<ul style="list-style-type: none"> Wipe off regularly when cooktop and lower oven are cool. Do not allow food containing acids (such as vinegar, tomato, lemon juice or milk) to remain on surface. Acids will remove the glossy finish. Do not use abrasive or harsh cleansers.
Surface units	No cleaning required.	<ul style="list-style-type: none"> Spatters or spills will burn off. Do not immerse in water.
Chrome reflector bowls	Automatic dishwasher or warm, soapy water and plastic scrubbing pad.	<ul style="list-style-type: none"> Wash with other cooking utensils. Clean frequently. Do not use abrasive or harsh cleansers.
Broiler pan and grid	Warm, soapy water or steel wool pad.	<ul style="list-style-type: none"> Wash with other cooking utensils.
Control knobs	Warm, soapy water and soft cloth.	<ul style="list-style-type: none"> Wash, rinse and dry well. Do not soak.
Control panel	Warm, soapy water or spray glass cleaner.	<ul style="list-style-type: none"> Wash, rinse and dry well. Follow directions provided with cleaner.
Oven racks	Warm, soapy water or soapy steel wool pads.	<ul style="list-style-type: none"> Wash, rinse and dry. Use soapy steel wool pads for stubborn areas.
Oven door glass	Spray glass cleaner; Warm, soapy water or plastic scrubbing pad.	<ul style="list-style-type: none"> Make sure oven is cool. Follow directions provided with cleaner. Wash, rinse and dry well with a soft cloth.
Standard oven	Warm soapy water or soapy steel wool pad. Commercial oven cleaners.	<ul style="list-style-type: none"> Remove door for easier access. Place newspaper on floor to protect floor surface. Follow directions provided with the oven cleaner. Rinse well with clear water. Use in well ventilated room. Do not allow commercial oven cleaner to contact the oven seals, thermostat or exterior surfaces of the range. Damage will occur.

Changing the Oven Light

The oven light will **only** come on when you push the Oven Light switch on the control panel. Push it again to turn off the light.

1.

2. Remove the light bulb from its socket. Replace the bulb with a 40-watt appliance bulb. Turn the power back on at the main power supply.

If you need service or assistance, we suggest you follow these four steps:

1. Before calling for assistance...

Performance problems often result from little things you can find and fix yourself without tools of any kind.

If nothing operates:

- Is the power supply cord plugged into a live circuit with the proper voltage? (See "Installation Instructions")
- Have you checked your home's main fuses or circuit breaker box?

If the oven will not operate:

- Is the Oven Temperature Control turned to a temperature setting?

If surface units will not operate:

- Have you checked your home's main fuses or circuit breaker box?
- Are surface units plugged in all the way?
- Do the control knobs turn?

If surface unit control knob(s) will not turn:

- Did you push in before trying to turn?

If cooking results are not what you expected:

- Is the range level?
- Are you using pans recommended in the **Cooking Guide**?
- If baking, have you allowed 1½ to 2 inches (4-5 cm) on all sides of the pans for air circulation?

- Have you preheated the oven as the recipe calls for?
- Are the pans the size called for in the recipe?
- Are you following a tested recipe from a reliable source?
- Do the cooking utensils have smooth, flat bottoms and fit the surface unit being used?

See the **Cooking Guide** for more information on cooking problems and how to solve them.

2. If you need assistance*...

Call Whirlpool COOL-LINE® service assistance telephone number. Dial free from:

Continental U.S. . (800) 253-1301
Michigan (800) 632-2243
Alaska & Hawaii (800) 253-1121

and talk with one of our trained Consultants. The Consultants can instruct you in how to obtain satisfactory operation from your appliance or, if service is necessary, recommend a qualified service company in your area.

3. If you need service*...

Whirlpool has a nationwide network of franchised TECH-CARE® Service Companies.

TECH-CARE service technicians

are trained to fulfill the product warranty and provide after-warranty service, anywhere in the United States. To locate TECH-CARE service in your area, call our COOL-LINE service assistance telephone number (see Step 2) or look in your telephone directory Yellow Pages under:

APPLIANCES - HOUSEHOLD - MAJOR - SERVICE & REPAIR	ELECTRICAL APPLIANCES - MAJOR - REPAIRING & PARTS
OR

4. If you have a problem*...

Call our COOL-LINE service assistance telephone number (see Step 2) and talk with one of our Consultants, or if you prefer, write to:

Mr. Robert Stanley
Division Vice President
Whirlpool Corporation
2000 US-33, North
Benton Harbor, MI 49022

*If you must call or write, please provide: model number, serial number, date of purchase, and a complete description of the problem. This information is needed in order to better respond to your request for assistance.

FSP is a registered trademark of Whirlpool Corporation for quality parts. Look for this symbol of quality whenever you need a replacement part for your Whirlpool appliance. FSP replacement parts

will fit right and work right, because they are made to the same exacting specifications used to build every new Whirlpool appliance.

Making your world a little easier.
